LANCE KLUGE

OBJECTIVE

As a self-motivated, detailed oriented 4.0 student, Lance is seeking a full time Software Engineering position. He is highly driven to expand his technical expertise and apply experience gained during my internship to real world challenges. He excels in both independent and collaborative environments, demonstrating initiative, accountability, and a commitment to deliver high-quality work while asking thoughtful questions when needed.

WORK EXPERIENCE

Intern Full Stack Developer, Palantir; Denver, CO — 2026

- Developed a TypeScript package for Deltas as the primary internship project
- Contributed to an existing Java backend product

TECHNICAL SKILLS

- **Languages**: Java, TypeScript, Python, C, C++, JavaScript
- **Web & Data**: HTML, CSS, Node.js, PostgreSQL, RESTful APIs, NumPy
- **Development Tools:** Git, Docker, GDB, Postman, Codex, Claude

PROJECTS

NFL Game Predictive ML Model:

- Built a predictive analytics model using XGBoost, Pandas, and scikit-learn in Python to predict NFL game winners based on pre-game team statistics. Wrote code to compute statistics given game data. Developed models iteratively, experimenting with features used, and performed hyperparameter tuning using GridSearch CV. Achieved 65.5% accuracy in prediction of untrained seasons' results.

Euchre

- In collaboration with a fellow Euchre enthusiast I created a playable Euchre game with a local web interface. Primarily written in Java the project featured configurable game setup, score aware AI strategies that shifted aggression from hand to hand, and a large number of unit tests designed to mimic industry testing practices.

EDUCATION

University of Colorado Boulder — B.S in Computer Science, Minor in Philosophy — Spring 2027

4.00 GPA

Project Portfolio
